Fe75,Fe80 Iron additive

1. Properties & Application:

(1). Apply to the Fe element addition of aluminum and other alloys, replacing Al-Fe master alloys.

(2). Iron content: 75% or 80%. Put directly into the molten metal at normal smelting temperature, melts quickly (<3 minutes), the Fe element recovery $\geq 90\%$.

2. Package and Storage:

Appearance: gray tablet. 500g/tablet, 20kg/carton.

Keep dry and ventilated.

3. Period Validity:

Six months.
