ALSr10 Modifying Agent (stick/tablet)

Description of Goods

In the form of aluminium alloys,the length of stick is 1 meter,diameter is 10mm,quantity per each stick is 200gram, the tablet is round ingot,each weighs about 200gram.

Features of Goods

ALSr10 stick (tablet) is an excellent modifying agent to aluminium alloys,it can refine the grain of silicon in the alloy,improves the mechanical capacity of the alloy,the modifying operation has long-effect,stability in remelting and anti-decay properties.No pollution,simple adding machining,no erodent effects.

Chemical Composition

Elements	Composition%
Sr	9~11
Si	<0.16
Fe	<0.25
V	<0.1
Al	Others

Directions for use

After the melt transferred into the ladle or vacuum furnace,add the grain-refiner into the ladle or vacuum furnace with required amount.The quantity should be 0.2-0.4%,the required temperature is 720-7400C,skim off the dross before adding,then remove equally,removing can be done by FDU(foundry degassing unit) while refining and degassing,and also can be done manual,stay still for some time before using.

Packaging:

AlSr10 stick, 20kg/carton

AlSr10 tablet, 20kg/carton
